Functionalities:

- Sign-up Students and instructors
- Signup for classes
- Login and authentication
- Create classes and lessons

Description:

This is a simple educational website. When we signup for any classes , the data is stored at the backend(MongoDb is used). The next time we login , it will automatically recognize the person and will show the classes that person is registered for. There is separate accounts / Signup pages for students and teachers. For students only the classes they are enrolled in will appear at the time of login. And for teachers it will show the class id along with the class name.
